

Do the units include an assessment tool?

Our assessment piece is found within the **Parent Letter** section in each unit. It is to be used in conjunction with the **WORD** feature on our **Color CD**, which comes with every unit.

The assessment feature is uniquely designed so that teachers may tailor the goals and objectives for the individual needs of each student, or the needs of your entire classroom.

For children with an "Individual Educational Plan" (IEP), you may amend these goals and objectives to create a very parent friendly IEP.

Our assessment tool uses a 1-5 rating scale to assess the progress of your students based on the goals and objectives from the unit, or those that you have amended. A handy assessment grid is included in each unit for your convenience.

It is most beneficial to share a copy of this assessment with parents along with the storybook. When parents read with their child at home, they will be able to

same goals and objectives that you have been working on in the classroom. **Providing the assessment information as well as the storybook creates an important communication link between home and school!**

Storybooks may be obtained at a discount from Scholastic Literacy Partners, See additional information on this CD or on our website at www.readitonceagain.com.

Permission is granted to individual classroom teachers to reproduce portions of this CD for classroom use only.

This CD contains pages and activities that have been colored in an effort to decrease teacher preparation time.

Page numbers on this CD match the page numbers found in the unit.

For teaching purposes we have selected primary colors that appear consistently throughout the unit to reinforce visual repetition and color recognition.

Run pages on cardstock and laminate for durability and repeated use.
